## PROFESSIONAL SUMMARY

Full Stack Developer specializing in building scalable web applications using **Next.js, React, TypeScript, Node.js, Prisma, and PostgreSQL**. Experienced in designing modern SaaS applications with authentication, role-based access control, REST APIs, dashboard analytics, and deployment workflows. Passionate about writing clean, maintainable code and solving real-world business problems through modern software engineering practices. Currently expanding expertise in backend architecture, Docker, and AI-powered applications.

## TECHNICAL SKILLS

**Languages**: Typescript/Javascript , SQL , HTML5/CSS3
**Frontend** : React.js , Next.js , Vite , Responsive UI , Tailwind CSS , Resend , Component Architecture
**Backend**: Node.js , Express.js , REST API , OAuth Authentication , Server Actions , Middleware
**Database & DevOps**: PostgreSQL , MYSQL , Prisma ORM , Docker , Git/GitHub,GitHub Actions,Prometheus,Grafana
**Concepts**: Code Management, Authentication ,Authorization,RBAC,MVC,Database Design,API Design,Responsive Design,SaaS Architecture, State Management

## PROJECTS

### ClientFlow | Next.js | TypeScript | Prisma | Neon | TailwindCSS | Shadcn UI

A production-style SaaS platform designed to help freelancers manage projects, invoices, clients, tasks, and business performance from a centralized dashboard.

- Designed a complete freelancer management system using the Next.js App Router and TypeScript.
- Implemented secure authentication with OAuth and protected dashboard routes.
- Built modules for project, task, client, and invoice management with relational database modeling using Prisma and PostgreSQL.
- Developed dashboard analytics with revenue tracking, project statistics, invoice summaries, and performance insights.
- Created reusable UI components using React and Tailwind CSS to ensure responsive experiences across devices.
- Applied modern software engineering practices including reusable architecture, server-side rendering, and API abstraction.

### Modern College Website | React | Vite | GSAP | Tailwind CSS

- Developed a modern, responsive college website with an intuitive user interface and smooth user experience.
- Built reusable React components using Vite for fast development and optimized performance.
- Implemented interactive scroll-based animations and page transitions using GSAP.
- Created responsive pages for Home, About, Departments, Admissions, Faculty, Events, and Contact.
- Optimized the website for desktop, tablet, and mobile devices using Tailwind CSS.
- Applied component-based architecture and clean code practices for scalability and maintainability.

## EDUCATION

**Bachelor of Computer Application (BCA)** — *2023 – 2026*
*DAV CHD 10 - Panjab University*

***12th - Non Medical*** — *2022 – 2023*
*Central Board of Secondary Education(CBSE)*

***10th*** — *2020 – 2021*
*Central Board of Secondary Education(CBSE)*

## ACHIEVEMENTS

- Built a production-scale SaaS application from scratch using modern full-stack technologies.
- Implemented OAuth authentication, REST APIs, Prisma ORM, and relational database design.
- Strong understanding of Git workflows, version control, and collaborative software development.
- Continuously learning advanced backend engineering, cloud deployment, and scalable system design.
